

Digital Slide Hosting Service

Let us host your digital slides and you'll benefit from an affordable and easy-to-manage digital slide hosting and management interface while we maintain the software, hardware, and other IT components for you.

Our Digital Slide Hosting Service will allow you to bypass system maintenance and get up and running in record time.

Host your digital slides with us and have access to your library anytime, anywhere.

EDUCATION

Build a voluminous digital slide reference center of histology slides and pathology cases that can be used for self-study by students. Add clarity to instruction by annotating regions of interest. Integrate course syllabi and labs, creating a digital laboratory accessible to students from any location.

PUBLICATION SUPPORT

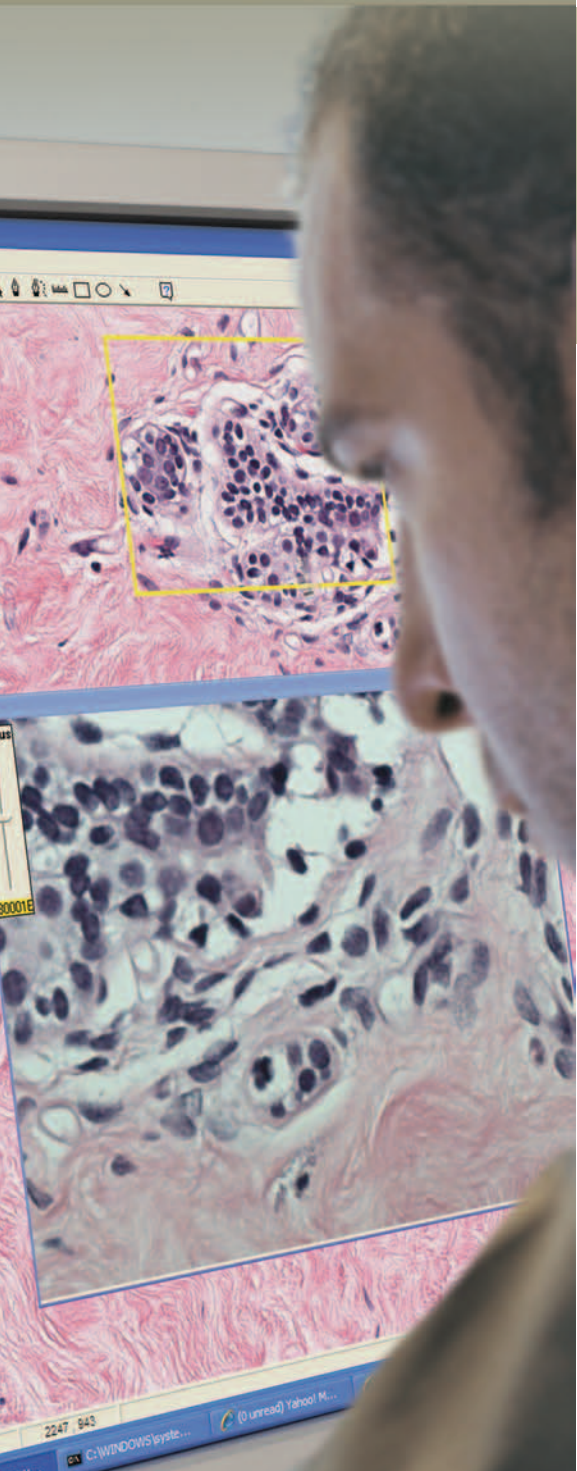

Supplement pathology journal articles by hosting digital slides and then referencing the location of the digital slide in the paper journal; you can even embed links directly in the electronic journal. Your readers can access the whole digital slides represented in the article from any location at any time.

CONFERENCES

Allow your audience to preview digital slides before presentations. Provide registrants with a complete collection of presentation slides, allowing them the opportunity to take cases back to their institutions for later review or use in education.

DECISION SUPPORT*

Archive interesting or difficult cases for later review. Quickly access and reference these cases from any location.

HOW TO GET STARTED:

STEP 1

Send us your digital slides or glass slides for digitization through our scanning services department.

STEP 2

We'll establish your hosting account and upload your digital slides.

STEP 3

We'll provide you with a username and password to protect and view your slides and supplemental data.

STEP 4

Log on at www.slidehosting.com and start taking advantage of digital pathology while we maintain the software, hardware, and other IT components.

With two flavors of hosting functionality, you can find the perfect fit for your organization. Basic hosting includes select Spectrum™ functionality such as viewing and editing of digital slides, password protection, and search capabilities.

For more advanced functionality, such as administrative rights to fully control and customize your applications, digital slide conferencing for multiparticipant interactive viewing, the ability to create and manage multiple users and data groups, and server-side image analysis, Spectrum™ Plus Hosted is for you. This dedicated Spectrum Plus instance unlocks the full power of the most comprehensive digital pathology functionality available, all in a user-friendly web environment, and hosted at our facility.

Feature	Basic Hosting	Spectrum™ Plus Hosted (dedicated application)
